OXY-SHIELD[™]

Landscaper's Steel

Complete the look with a range of screens, trellis, planter pots and edging.

OXY-Shield[®] is a **specialy formulated** landscaping steel designed to impart a **decorative rust-look** without the inherent degradation of regular steel.

With similar properties to stainless steel, OXY-Shield[®] will oxidise and form a surface coating that is **resistant to corrosion and flaking**.

For more details and installation tips, please refer to the website.

Rich rustic patina deepens over time

OXY-Shield[®] Technology

-  Unique rust-look
-  Architectural feature
-  Rich natural tones

meetjack.com.au

Jack®

OXY-SHIELD™

Landscaper's Steel

OXY-Shield® develops a rich, earthy patina in weeks — a favourite amongst landscapers, the rustic tones blend effortlessly into any backyard or courtyard setting.

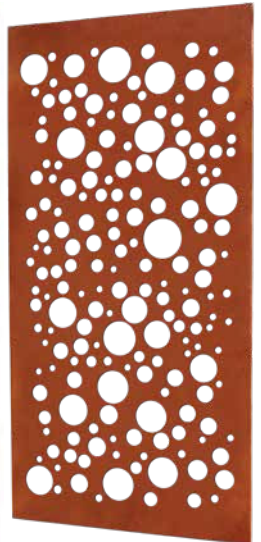

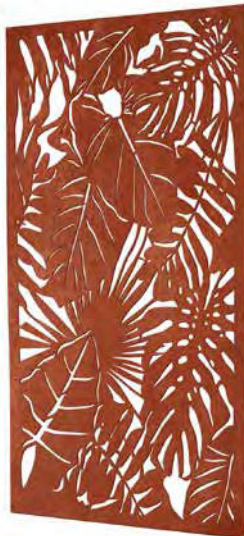

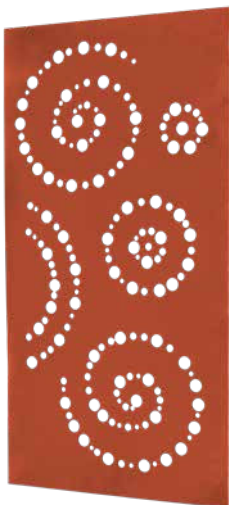

To accelerate the effect, wipe surface clean to remove excess oils and spray regularly with a fine mist of water.

Laser Cut Panels

OXY-Shield® screens enhance the aesthetic of any surface around your home, backyard or entertainment area. Available in 5 architecturally-inspired designs. Additional seasonal designs available in store throughout the year.

Installation

Easily install using the built-in hanging holes

OXY-Shield® planters create a unique alfresco-living look, ideal for every area of your home's outdoors due to their versatile size and contemporary styling.

A great decorative garden feature, the larger Casa and Café Series are perfect for luscious green plants or bright and colourful flowers; the smaller Copa Series is also perfect for cacti and succulents.

All planters are supplied with drainage holes and caps. Simply add or remove caps for water drainage.

Podium Landscape Rings

Podium Landscape Rings feature deep, rich natural tones with architecturally-inspired design. Personalise your garden space with multiple configurations. Ideal for garden beds, there are three ring sizes that can be used individually, or as sets in multiple configurations for maximum effect and creativity.

Configurations

Personalise your garden space with multiple configurations.

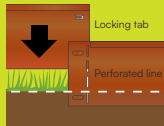

Interlocking Edging Strips

OXY-Shield® Interlocking Edging Strips protects and partitions your garden. Easy to install in straight runs; angled or curved to suit your path and garden border. The flexible strip is ideal for curves. To install, use the built-in pin-through tabs. The flat edging simply taps into place.

Locking Tabs

Easy to connect

Interlocking Tree Rings

OXY-Shield® Interlocking Tree Ring protects and enhances tree and shrub plantings. Easy to install around new or existing plants - just tap into place and lock together. For large trees, simply add more interlocking rings.

Retain-it[®]
Heavy Duty Retaining Post System

Product Selection Guide

Converts timber sleepers into timber walls

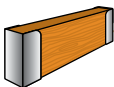

A retaining post system that provides a snug fit so that the sleeper is dropped in and immediately secured. No packing or fastening is required.

As functional as it is beautiful, the system has the strength and long-life of high tensile, galvanised steel; and is flexible enough to cater to retaining walls up to 800mm high.

- Long-life steel
- Professional steel
- Quick and easy

Available in 4 post heights and 3 configurations

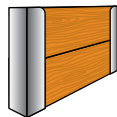

1

200MM RETAINING WALL

POST HEIGHT (MM) **450**

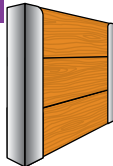

2

400MM RETAINING WALL

POST HEIGHT (MM) **750**

JOINER POST

Joins sleepers in
straight lines

CORNER POST

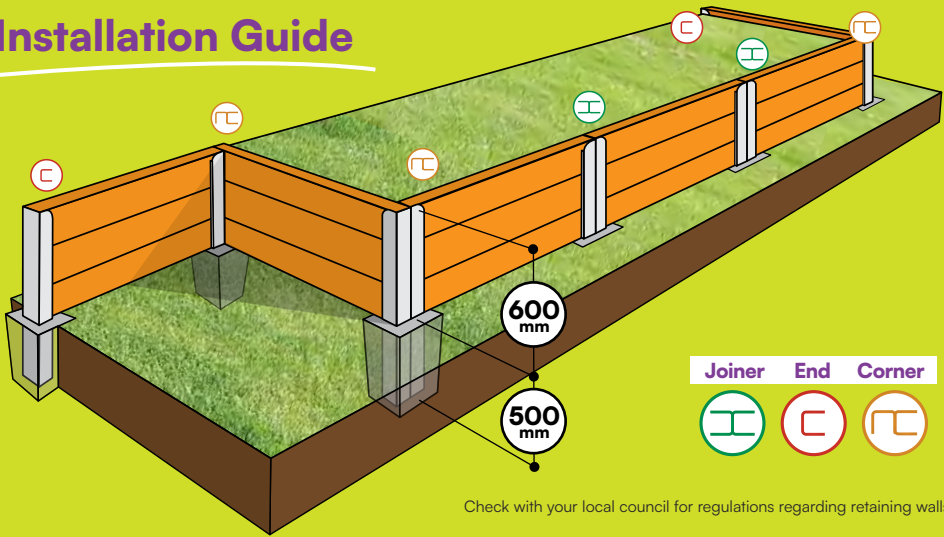

Corner post for a
perfect 90° corner

END POST

A neat finish for
the end of a wall

Installation Guide

Check with your local council for regulations regarding retaining walls.

As easy as 1, 2, 3

Joiner posts	1	Sleeper lengths
End Posts	1	4 x 1,200mm
Corner Posts	2	4 x 2,000mm

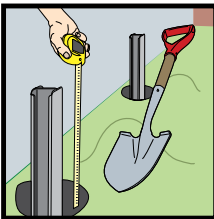

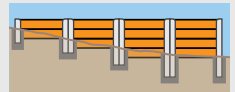

Step 1 : Design and plan

Measure your planned space and design the layout of your retaining wall on paper. Remember to include the heights required.

Determine the post sections and number of posts required by referring to the Product Selection Guide.

Galvanised steel is suitable for use with quick-setting or regular concrete.

Tip Use multiple heights of Retain-IT on sloping blocks for a level finish.

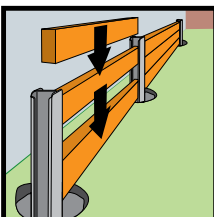

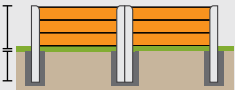

Step 2 : Prepare the site

Clear the area and mark out the run of your wall and the position of your posts. Dig holes for each post, and double check that your sleepers will fit snugly.

For stability, the posts should be approximately halfway below ground and halfway above. Walls with shallow foundations will be less stable.

Tip Concrete one post at a time, adding sleepers as you go to ensure a straight wall.

Step 3 : Build and concrete

Use a level and string line to ensure posts are straight and upright. Pour concrete to set the post at the correct height and spacing — a quick-setting concrete is recommended.

Insert your timber sleepers and move on to the next post until your retaining wall is complete.

Tip For a different finish, add a layer of timber capping to the top of the wall.
