DIY NATURAL ROPE COASTERS

STEP-BY-STEP GUIDE

If your Pinterest boards are full of beachy vibes or earthy tones, but you're on a budget, you're in the right place! We're diving into another *easy peasy* project with Jack.

We're making our own natural rope coasters using [Jack Heavy Sisal Twine](#) or [Coco Fibre Rope](#)!

This one is so easy, you'll ask yourself why you didn't make it sooner. So grab your twine or rope and we'll glue our way to some seriously stylish coasters.

Project created by [@herkitchengarden](#)

What you'll need :

Jack Heavy Sisal Twine or Coco Fibre Rope

Hot glue gun & glue sticks

Heat resistant gloves (for using hot glue)

Additional Materials :

Scissors

Pencil & Fabric (for circular template)

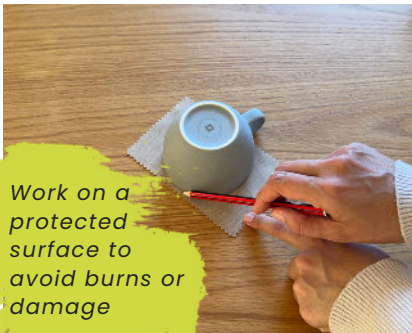

For the plain circular Coaster: Prep the base

Put on heat-resistant gloves before handling the hot glue gun

Cut out the circular fabric template to use as the base for the coaster. This will guide the shape and add extra stability.

Work on a protected surface to avoid burns or damage

Handy Jack tips!

Use a cup as a guide or any item that you'd like to use the coaster with.

Step 2

Start the Coil

Apply a small dot of hot glue at the end of the twine and begin rolling it tightly into a spiral. Be careful when pressing down to avoid burns - let the glue cool slightly before touching.

Step 3

Build the Coaster size

Continue coiling and gluing until the coaster reaches your desired size.

Cut the twine and glue the end securely, ensuring all edges are sealed.

Finishing Touches

Trim any loose fibres and ensure all pieces are glued securely. Let it cool completely before use.

Handy Jack tips!

Cut off any hot glue that may have seeped out using scissors.
